SCO No.1, Opp Gate No.2, Sunny Enclave, Jandpur road, Kharar

LARGEST DENTAL CHAIN IN TRI-CITY
Since 1998

TO WHOM IT MAY CONCERN.

It is hereby by affirmed that I have used both the Implants (d-dent & Bio-3) system from last six months.

- The osteointegration is very good.
- The inventory is very less (best).
- The bit system (drill sequence is very simple) good for beginners.
- The quality of skulls is very good.
- Transparent dealing.

Dr.

Bio-3 is one of the best implant

in T4 grade

Thanks
(Dr. Naveen Arora)

I have used alphacelent &
Bio3 implants since 1-2 years
I am very much satisfied
with the results.

Medical Center "ROYAL-DENT" is grateful to Bio3 Implants Company for the cooperation.

We work with the Bio3 Implants System for not so long but we already can make conclusions about the implants, its surface and manual characteristics while working with it.

Surgical Kit is very simple, everything is clear at once for both the surgeon and assistant. It is very convenient that there are drills in the kit, which perfectly match the implants shape as well as stoppers that helps not to worry about the formed bone cavity depth. The wrenches flexibility facilitates both surgical and orthopedic implant.

Our implant surgeon is very fond of implants Advanced with the fine-pitch thread and extended surface area as well as of the implant accompaniment with the bone graft material.

We thank Bio3 Implants team for the qualitative work and service.

We were delighted to attend the training courses for Bio3 Implants system, which were attended by implant surgeons and a restorative clinician of our dental clinic.

All the staff and the patients are very satisfied with our cooperation.

Yours faithfully,
team of the medical center "ROYAL DENT"

Letter of gratitude to the Bio3 Implants Company

Dental clinics network "Brothers Lepsky" and "Brothers Lepsky "Plus" express sincere gratitude to the company **Bio3 Implants** for the effective cooperation.

Doctors of our clinics in their daily practice apply implants of **Bio3 implants** and note its tools high ease-of-use when installing implants. Selection of the implant

The choice of implant depends on the clinical case of every particular patients that is why we prefer an individual approach to selecting the treatment plan for implant patients.

Our surgeons many years' experience allowed evaluating the quality of different implant systems, so we believe our opinion is rather objective.

Together with the highest quality of German implants **Bio3 Implants**, we obtain the most competitive price for the premium segment implants at the right price and super service from the manufacturing company.

It is twenty-four-hour reception and delivery of goods, it is the replacement of implants for any reason, it is a professional staff, it is a support of doctors by carrying out various levels trainings, it's a lot of useful materials for patients about oral hygiene after implantation and various recommendations, it is gifts to patients and doctors of branded products and many other things.

The strong impression to our clinics team made the manufacturing plant in Germany, which we visited this summer. Full production cycle, own laboratory for a progressive implant surface creation and, of course, quality assurance! Each product unit (!) passes individual quality inspection. German companies are drawing special attention to this, and **Bio3 Implants** is not an exception. Also, research department, which works on the range increase, according to the ever-changing demand for tools, accessories, etc.

We thank to Bio3 Implants Company for perfect implant system and perfect teamwork of professionals.

We honor our partnership and hope to continue improving together in future.

Lepsky V.

OUR CLIENTS' FEEDBACKS

DEAR PARTNERS!!!

Dental clinic "SA-NATA" is grateful for the good, high quality, sharp work of whole the Bio3 Implants team.

We are favorably impressed by the excellent work of the whole company, starting with managers who promptly and with great enthusiasm are working on orders, finishing with timely supply and logistics by couriers.

It can also be separately emphasized the support by promotional materials and pleasant bonuses, regularly arrived at our clinic.

We confirm - the quality of products is up to the mark!

In the whole, it was easy and productive to cooperate with you in the current 2015. In the coming new 2016 year, I would like to wish at least as high level of performance as in this year, and of course - further development and prosperity of your company. Impress us with new sophisticated developments, surprises and promotions.

Yours faithfully,
Dental Clinic "SA-NATA"

"LIRA" DENTAL CLINIC REVIEW

My first experience with the system of dental implants Bio3 Implants is comparatively fresh, but was immediately «without a peep».

There were a few implantations of 6-7 implants, each using of a bone graft, IPRF, etc. I would like to mention some important points about the system.

Firstly, decently wettable surface, it is very noticeable during the installation.

Secondly, excellent initial anchorage, which if desired can be used for an immediate functional loading, and especially when planning large works.

There is a large variety of implant sizes in the system that allows to perfectly select the required length to diameter ratio.

As for the set: a set is absolutely cross functional and practical, it allows working with different implant systems. The presence of stoppers on the cutter pleasantly surprised, although it is a little difficult to put on and remove it. I would be glad to have torque wrench in my set. There are also lots of other different utilities. In general, developers gave a very competitive product with an excellent quality-price ratio and the beautiful performance of the implant itself.

We are particularly pleased with the company's service, thanks to which you can solve absolutely any question of force majeure, including the immediate delivery of the implants to clinic.

Bio3 Implants Product Reviews

Implantology – it is a responsible branch of dentistry that significantly hits one in the pocket and tramples the reputation, in case of any complications. For that very reason, one of the systems that we prefer is Bio3 Implants products.

Especially in cases of implantation necessity to allergic patients, as Bio3 uses bioinert, without additives, pure titanium Grade 4. This product fully complies the declared quality of premium segment, but the price is in the middle segment. The presence of the most advanced hydrophilic surface greatly reduces the risk of possible implant failure.

In terms of marketing, it pleases by precious design and packaging complement, continuous carrying out of lucrative offers, master classes, and 0.1 g of osteoplastic material free of charge to each implant. The surgical protocol pleased with the presence of the tap even for an aggressive line "Progressive".

The orthopedic protocol pleases with the presence of driver-transfer coping and aesthetic abutment in each package. That distinctly reduces future level of costs that in turn lowers the price of the implant even below the budget one.

Not every system, even beyond the expensive segment can boast of such a benefits list.
